

2% B₂H₆/H₂ mixed gas

Properties: DIBORANE (borane compound, B₂H₆) is a colorless gas with an irritating odor. It can be dissolved in solvents such as carbon disulfide, ethane, pentane, ether, etc. It burns explosively when it meets moist air, releasing green flame and generating boron oxide and water.

Uses: Used to produce UHP boron, raw materials of the semiconductor industry and the high-energy fuel gas for missiles and rockets.
